ENVIRONMENT, GREAT LAKES, AND ENERGY

Scrap tires pose a fire risk and a human health risk as mosquito breeding grounds. Whole tires have been banned from Michigan landfills since 2004. Fortunately, tires can be 100% recyclable! Over 10 million scrap tires are generated annually in Michigan. These tires can be turned into mulch, tire derived fuel, incorporated into roads, shredded and used for aggregate in backfill and drain fields, and some are even used to manufacture new tires and plastics.

Processors and retailers may charge a fee to recycle tires. This fee does not go to the EGLE Scrap Tire Program. The Program is funded by a \$1.50 vehicle title transfer fee. Using program fees EGLE provides grants to cleanup scrap tires sites, and for the development of new markets to utilize scrap tire material. EGLE also partners with law enforcement to cease illegal dumping and disposal of tires.
